

# SUGARCANE HARVESTER AC60

## ADVANTAGE INTRODUCTION

- Suitable for working on slope below 10° and field over 1.2m row spacing
- Driving power is 20% larger than other counterparts, fast for transferring cane field
- Conveying channel adopts automatic variable-diameter conveying technology
- The hydraulic motors can realize one-key operation through the buttons on

Suitable ridge spacing	-
Suitable ridge height	0~200mm
Suitable slope	≤10%
Row spacing	≥1200mm
Feeding capacity	6kg/s
Net hourly productivity	-
Net work hour productivity	> 15t/h
Loss rate	≤7%
Impurity rate	≤8%
Sugarcane acceptability rate	≥90%
